Betr.:

Dear Mrs. Musgrave,

i am sorry for the late return of the video. Our implant-group was very much impressed by your excellent work.

The child implanted this summer in Hannover progresses very well. He uses the implant now all the day.

At the Frankfurt University, we implanted five patients until and plan two more till the end of the year. For the first year, i think it is a nice start.

Best regards

Dr. med. Mertens

Dear Gaye

Thank you so much for all the time you gave Carolyn and me during our visit.

I feel that watching you work with the children was the best possible way for me to learn successful methods both for programming and for habilitation. I really appreciate having the opportunity to see what you and the children have achieved.

Perhaps Carolyn and I can come back in three or four years' time. I'm sure we'd be impressed all over again with the children's progress.

I'm enclosing some presents from Carolyn and me to thank the children for letting us watch them.

Many thanks to you and Rosalie. It was a pleasure to meet you both.

Yours sincerely

Susan

Dear Gaye

We are planning a course on Cochlear Implants in Zurich for next September. I was very impressed when I saw the videotape about your rehabilitation work with children last december and I would like to ask you whether we could show this tape during our course. I have already spoken with Dr. Lange from Cochlear AG Basel who has a copy of this tape and would lend it to us if you agree. Additional written material would of course be welcomed in order to facilitate the introduction and commenting of the movie.

Thank you very much for your help

With my best wishes for your work I remain

Yours, sincerely

Norbert Dillier, Ph.D.

8th February, 1988.

Dear Gay,

I was asked by the Editorial Committee of the Hearing Technology Review for a suggestion re a paper on the Educational Consequences of the Cochlear Implant. I immediately thought of you. I think the 'applied' area of technology is surely the crucial one and your work seems to me to be at the forefront of that. I was given a copy of your paper from the A.A.H.A. Conference by one of our students and was delighted to see the linking of Ling with Process Analysis. She also gave me a copy of an abstract of a paper on Discourse Analysis. Would it be possible to get a copy of this for our file?

I was fortunate enough to be tuned in to the A.B.C. the morning of your radio session discussing the Sydney project with a parent and another member of the team. Would you know if audiotapes of the session are available?

If you ever get down to Melbourne and have the time I would really love to have the chance to discuss your approach.

Finally, if you would be prepared to submit an article for the Hearing Technology Review, could you drop me a line or to Ross Dineen at the H.E.A.R. Service, 101 Wellington Parade South, East Melbourne, 3002.

Kindest regards,

Anne Hollingshead

Anne Hollingshead.

- 1) A.B.C. tape
- 2) Discourse paper
- 3) Write paper on educational consequences.
